

# Notes on putting Screen Filter on MONITOUCH

Thank you for purchasing Screen Filter for MONITOUCH, Vxxx-GS/Vxxx-GSN.

Make sure that the delivered filters conform to your requirement, and also check for any missing or damaged parts.

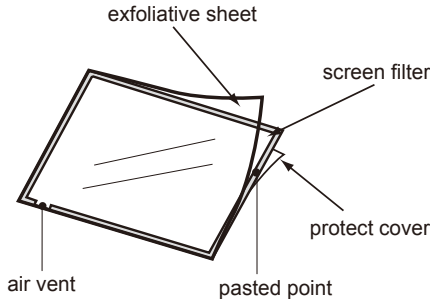

And when you put a screen filter on MONITOUCH, note the following points:

## Product configuration

Screen filter ..... 5 filters  
This manual ..... 1 copy

## Notes on putting screen filter

- A screen filter has two covers as the following figure shows. One is an 'exfoliative sheet' which is pasted on a screen filter. On the reverse side of a screen filter, there is a 'protect cover' to protect a screen filter.
- **Use a screen filter with both covers (an 'exfoliative sheet' and a 'protect cover') peeled off.** If the protect cover is not peeled off, the transmissivity will go down.
- When both 'exfoliative sheet' and 'protect cover' are transparent, it is difficult to distinguish these covers.  
The cover with a gloss is an 'exfoliative sheet'.
- In the case of using the screen filter with an air vent, put it on a touch panel with the air vent down.
