When displaying using a switch part or by giving a command (control device memory) from a PLC: <ul style="list-style-type: none"> - Folder path specified Any folder specified - Folder path not specified (default) (output drive)\(access folder)\PDF <div style="text-align: center;"> <pre> graph TD SD[SD 2GB] --- EXT0000[EXT0000 (default access folder name)] EXT0000 --- PDF[PDF] PDF --- PDF00000[PDF00000.pdf] PDF --- Trouble[Trouble.pdf] PDF --- Update[Update.pdf] </pre> </div>

*1 Larger PDF files and those with many figures and images will take longer to open

*2 PDF files created with font information embedded can be displayed regardless of the fonts selected in the [Transfer Font Setting] tab window.

For details on access folders, refer to "8.2 Access Folders" page 8-2.

Storing Files on a Storage Device

Either Windows Explorer or the storage manager can be used to store files.

- Windows Explorer
Open the storage device drive and save the necessary PDF files.
- Storage manager (only when folder path is not specified)
Store the necessary PDF files at "C:\MONITOUCH\User\PDF" (default) using storage manager.

For details, refer to "8.3.11 Storing PDF Files" page 8-25.
