

## 4. Ethernet (TS2060i Only)

Pressing the [Ethernet Information] switch in the Main Menu drop-down window displays the Ethernet Information screen.

This screen is used to check the Ethernet information of the TS2060i unit and set the IP address.

Pressing the [Ethernet] switch on the Ethernet Information screen displays the following screen. The IP address of the TS2060i unit can be set on this screen.

This switch changes between [IP Address Setting] and [Select IP Address from Network Table]\*.

After setting the IP address, press the [Setting Finished] switch to confirm the setting. The Main Menu screen reappears.

\* Refer to the TS2060 Connection Manual.
