Item	Description
Backlight OFF Time	0~65535 (sec) This setting is only available when [Auto 1], [Auto 2] or [Auto 3] is selected for [Action]. Set the length of time that elapses before the backlight is turned off after the OFF conditions have been met.
Control during Backlight Power ON	This setting is only available when [Manual] is selected for [Action]. Select the backlight ON/OFF status for when the power is turned on and when the mode changes from STOP to RUN.

- \*1 When the entire screen display is refreshed, such as when changing over the entire screen or turning on/off or switching an overlap display, the time measured for [Backlight OFF Time] is cleared.
- \*2 No switch data is output if a switch is pressed with the backlight off. When a switch is pressed with the backlight off, the backlight is turned on. Switch data is output from switch operations made after 500 ms has elapsed since the backlight was turned on.
- \*3 Disabled when the control device memory is ON.
